

Refrigeration

Classes begin August 17, 2015

At

AVTEC

Building and Energy Technology Facility,
Seward

AVTEC-Alaska's Institute of Technology offers four-month refrigeration classes twice a year. The next course beginning this August 17th, 2015.

This course will train you to be able to diagnose, repair and install a wide variety of freezing and cooling equipment used in residential, commercial, and industrial applications. That equipment includes home and retailers refrigerators and freezers, ice machines, building air-conditioning and heat pump systems, food processing plants, transportation and fishing vessel refrigeration..

Trained and experienced refrigeration technicians are in high demand throughout the world and can command excellent wages and benefits for their expertise. This course will enable most graduates to work with confidence in one of the many refrigeration jobs available in Alaska and elsewhere. The industry approved curriculum includes: Electricity and motor controls, copper and iron piping practices, oxy-acetylene torch use, refrigeration design and installation, ammonia refrigeration, and safe work practices with a variety of hand and power tools. We use competency based learning practices to ensure that the student is able to do the tasks which most refrigeration companies require.
