

# Low Profile Pallet Mule

Misc-56: Wesley International, 5000 pound capacity, model 48-27-50AACR, Pallet Mule

Our Lowered Height All-American Pallet Mule® is designed for 1.75", 2" and 2.5" low profile, used or warped pallets. Heavier and more durable, this pallet truck is built to last. Even our standard model is an upgrade over the industry's standard pallet trucks. The articulating axle ensures proper load balance on uneven surfaces while the solid-cast push rod gives you stronger lifetime durability and easy maneuverability. Once you own an authentic Pallet Mule, it's the only pallet truck you'll ever want.
