

Surg-27 - OR
Integration

PRODUCT OVERVIEW

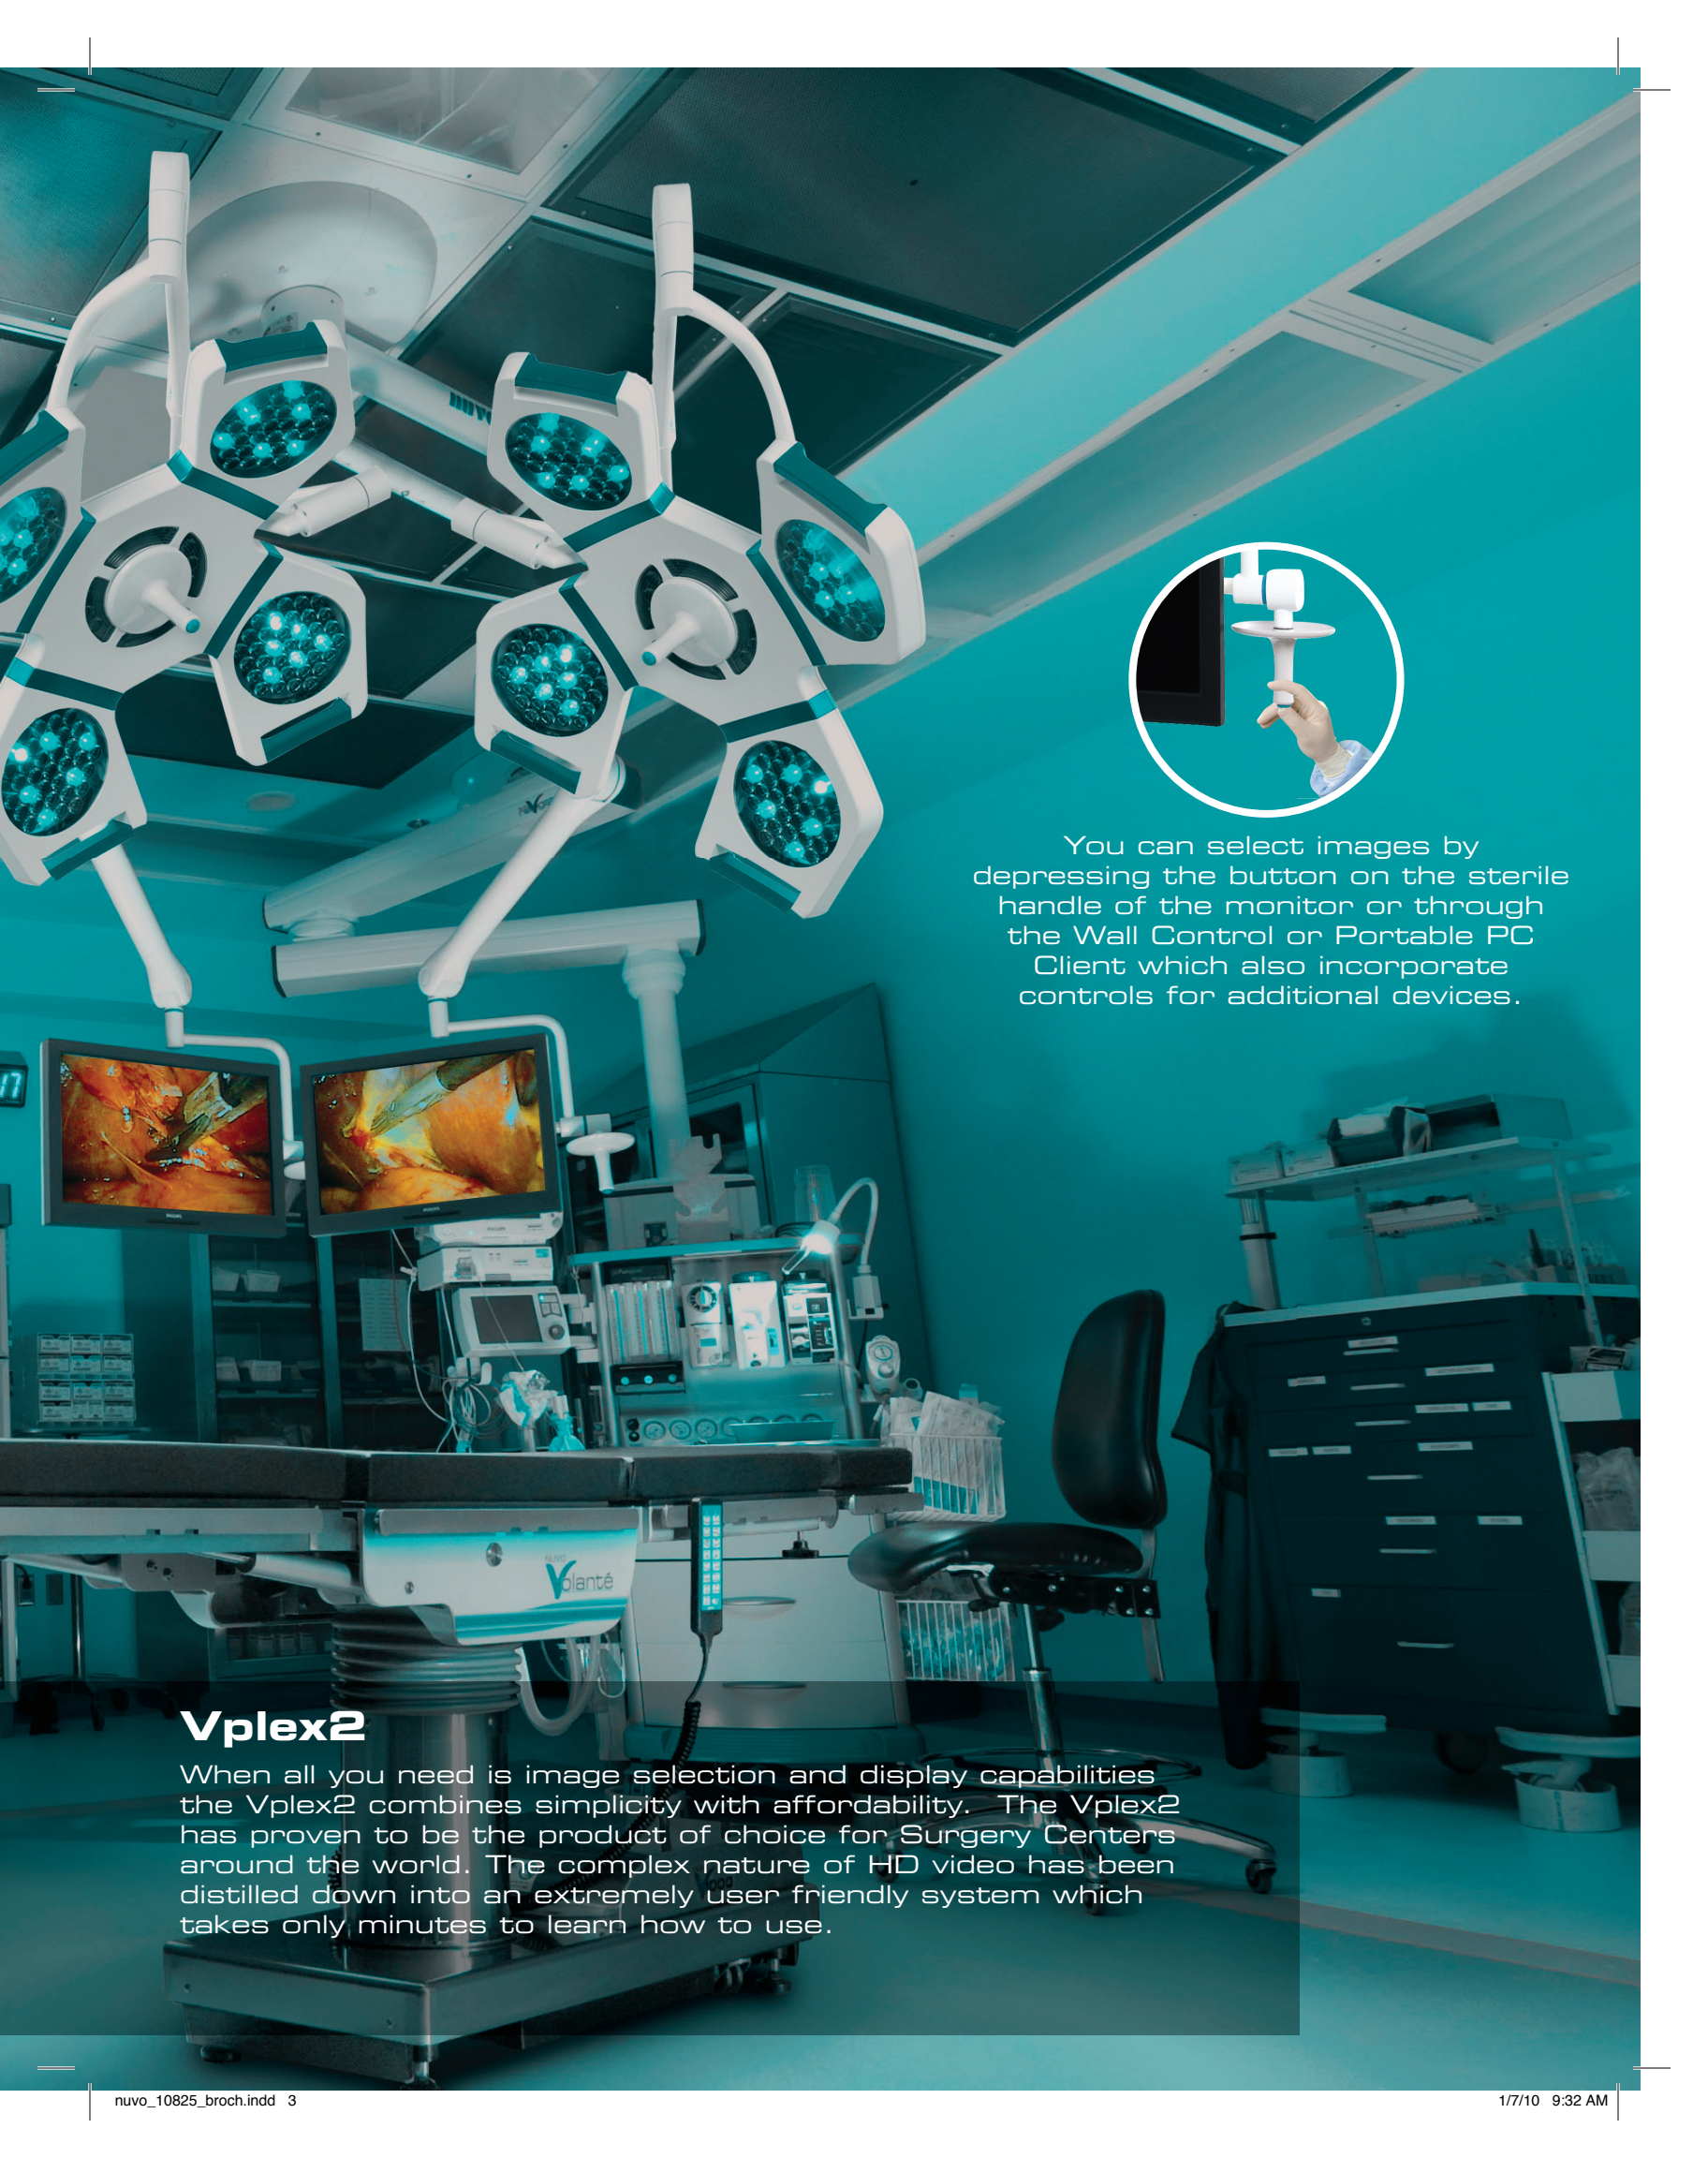

The NUVO Vplex Video Integration System Delivers High Definition Images Transmitted over a Fiber Optic Network with Unparalleled Simplicity.

The Vplex System uses state-of-the-art video technology to deliver the best quality images in the industry. They are delivered through fiber optic cables to ensure minimal interference and crisp clean high definition images in full color or monochrome.

Vplex4

Take your OR integration to a whole new level with the Vplex4. It combines the applications of your computer with that of your video GUI to deliver a truly integrated OR all at the tip of your fingers.

The Vplex system provides the platform to combine the controls for all the major pieces of equipment used in the OR into a compact portable PC Tablet, thereby making the controls very accessible and extremely easy to use.

You can select images by depressing the button on the sterile handle of the monitor or through the Wall Control or Portable PC Client which also incorporate controls for additional devices.

Vplex2

When all you need is image selection and display capabilities the Vplex2 combines simplicity with affordability. The Vplex2 has proven to be the product of choice for Surgery Centers around the world. The complex nature of HD video has been distilled down into an extremely user friendly system which takes only minutes to learn how to use.

**Nuvo provides the ability to take your
OR intergration to a whole new level...**

The **NEW** Vplex combines all the applications of your OR Computer with the Graphic User Interface of a video system to deliver it all in a single user friendly, portable, handheld Medical Grade Computer Tablet.

Use it docked at your circulators station with a keyboard or walk freely around the OR and initiate commands through its touch screen.

The NUVO Vplex Monitoring System Delivers...

The Vplex system makes it simple for the surgical team to select and display images on the monitors of your choosing.

Today's operating rooms demand real time images and data, as well as archived images to be available at the bedside to facilitate real time decision making.

The Vplex Integration System Can Work With Your Oldest and Newest Equipment.

No one has the money to replace all their old cameras, C-arms or Computers which is why the NUVO platform works for everyone. It will manage and display images from the very latest HD digital devices as well as integrate and display images from your older analog devices.
