

UltraCare® XT

leading bed evolution

UltraCare® XT

One bed. A total solution.

It's a perfect bed for **DELUXE ACCOMMODATIONS**

The UltraCare XT has been created to look as great as it functions with features that offer residents the comforts of home. Consider the attractive wood-detail option. It gives the appearance of a residential bed with a wide array of finishes. Stylish panels are also available. The UltraCare XT's UltraWide extension kit expands beyond a twin width and provides safer repositioning. For even more resident comfort, the PrevaMatt Elite surface is soft, yet highly resilient, gently cradling the resident's head and torso. Strategically-located mattress cuts promote easier flexing when the bed is being articulated and keeps the resident in place to reduce the need for repositioning.

It's a superior bed for **SKILLED NURSING FACILITIES**

When gerontologist consultants guide design, the result is the best geriatric bed in the industry. Enhanced controls include features like an intuitive pendant that's ergonomically functional and optional lighted buttons making use easier day or night. Add an assist handle with two positions for convenient use and perfect grip height to support resident being transferred in and out of bed. We even partnered with Tempur-Pedic to offer mattresses that deliver enhanced pressure redistribution and comfort. When put all together, the end result is a versatile bed that meets your care challenges with safety in mind.

You Wanted Functional Speed and We Responded

While our standard speed on the UltraCare XT has already improved by 33%, choose our new QuickCare option for a faster speed option.

Our QuickCare hi-lo speed option raises and lowers the bed in less than 35 seconds. This increases bed operation efficiency under typical load applications and faster articulation enables caretakers to deliver more enhanced resident care.

**It's a flexible bed for
BARIATRIC NEEDS**

Flexibility is another design element where no other bed compares. The UltraCare XT can extend to a wider surface area, efficiently adding up to 7" to the sleep surface so you can more effectively manage your bariatric population. Also, with a safe working load of 500 lbs and a possible mattress width of 39" or 42", your Joerns bed offers more room for comfort and safer repositioning. AdvanceCare provides gravity-assist repositioning and comfort chair positioning, offering flexible care solutions while making repositioning much safer and more comfortable for your residents and for your care providers.

**It's an ideal bed for
REHABILITATION NEEDS**

The UltraCare XT is in a class of its own. The UltraLock option is designed for mobility and security at any height, promoting safety or easier bed movement. The four-section sleep surface has a full-range of comfort with therapeutic positions that improve circulation. QuickCare hi-lo speed upgrade promotes more efficient care while repositioning is made safer and more comfortable when using the 39" or 42" UltraWide extension kit. The trapeze can be added for rehabilitation needs and adjusts to accommodate most residents' reach, with three working positions for greater flexibility. Add the Residential Style trim kit and you immediately lend a more homelike feel to the care environment.

**Better looking, better performing and more versatile, it's
the only bed you'll ever need. The evolutionary UltraCare XT
from Joerns sets the standard.
Once again.**

**Joerns
Healthcare**

Redefine Your Care Environment

We already make the best bed in the business. Naturally, we wanted to improve it and increased functionality was our guide. Introducing the evolutionary UltraCare XT from industry leader, Joerns Healthcare. It's safer, more comfortable, faster and easier to use, with advanced configurability features no other bed offers.

But what truly sets the UltraCare XT apart is its unprecedented versatility. A design that transforms both the healthcare industry and your facility's ability to provide superlative care in exceeding the unique and varied needs of your residents.

The UltraCare XT multi-faceted features enable you to use this bed across a broad array of service options. From standard to deluxe resident rooms, or short stay and bariatric applications, the UltraCare XT delivers flexible care solutions. It's the next-generation bed that's extraordinary in every way excellence is measured.

We've added to the great features you've trusted in the UltraCare bed.

- **Residential Style** – Attractive wood kit transforms bed's appearance to that of a residential bed.
- **UltraWide** – New wider bed extension kit offers additional comfort and safer resident repositioning.
- **Enhanced Controls** – Ergonomic for residents and caregivers with raised buttons, angled staff control, and optional backlighting.
- **UltraLock** – Provides quick, easy bed movement and security at any height.
- **AdvanceCare** – Gravity-assist repositioning and comfort chair positioning promote flexible, safer, more comfortable care.

UltraCare® XT

leading bed evolution

Joerns® UltraCare® XT Bed System

The standard UltraCare XT has the same great features you enjoyed with last year's UltraCare bed plus newly-designed controls, faster positioning speed, and IPX4 Fluid Ingress Protection Rating to name a few advantages. Then, upgrade to suit your facility's needs. Choose some of the great options shown on the facing page including AdvanceCare, UltraLock, Wood Trim, UltraWide, and QuickCare or experience other great features to customize your UltraCare XT bed. One bed. A total solution.

Features

- 1 **Toroidal architecture** engineering of the bed's steel frame is up to 30 times stronger than angle iron
- 2 **Therapeutic grid surface** offers improved air flow and ultimate support for the sleep surface
- 3 **Integrated pendant connections** on both sides of sleep platform
- 4 **Four-section sleep surface** offers full range of comfort and therapeutic positions, which may reduce skin shear
- 5 **Attractive bed panel options** available in a wide array of designs and finishes
- 6 **Staff control** allows caregivers flexibility to select which features may be adjustable by the resident (option)
- 7 **EasyLift Leg Lift** provides quick positioning for improved circulation
- 8 **Revolutionary arched legs** deliver a super-strong, wide stance for equipment clearance
- 9 **Four DC motors** supply amazingly quiet and smooth operation
- 10 **7-inch to 30-inch travel range** offers safety, whether resting at an ultra low height or providing care at the higher end
- 11 **Assist devices** have superior functionality and perfect grip height
- 12 **Sculpted button on assist device** for easy, "press and go" operation
- 13 **UltraLock** is available at the foot end or both the head and foot to maximize security or mobility at any height (option)

Simplified Controls

Ergonomically designed pendant meets geriatric needs with features soft touch edges, finger grips and optional enhanced back lighting, raised buttons and illuminated lock-out status.

OPTIONS

AdvanceCare Positioning

Features gravity-assist for easier and safer repositioning. Utilize Comfort Chair functionality for comfort, relaxation, improved circulation, and more ergonomic care by bringing the resident closer to the caregiver.

UltraLock

Designed for mobility or security at any height, while allowing for a 7" low height. UltraLock provides quick, easy bed movement.

QuickCare

With QuickCare, your staff can provide more efficient care. With a safe, quicker change to care positioning, your staff will also be more inclined to let the bed do some of the work for them leading to less physical strain.

Staff Control

Enhanced staff control design features IPX4 fluid ingress protection rating, angled view and optional backlighting for easy operation day or night.

ACCESSORIES

Residential Style Trim Kit

Attract new residents with a room décor that rivals that of home. No tools addition and removal of wood trim to your UltraCare XT frame to aid in customization for assist handle transfer support.

UltraWide

Transform your UltraCare XT to the widest 500lb safe working load bed on the market. The extra width makes for safer repositioning and a more comfortable night's sleep. Choose from 39" or 42" extension kits.

Pendant Holder

Smooth design easily affixes to Joerns assist devices making pendant stowage and retrieval simple. Residents can even operate the pendant while sturdily stowed out of the way.

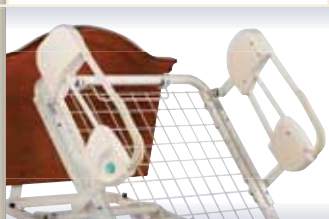

Trapeze and Trapeze Adapter

Trapeze adjusts to accommodate residents' reach; additionally, three working positions provide greater flexibility. Trapeze adapter allows attachment of a trapeze system.

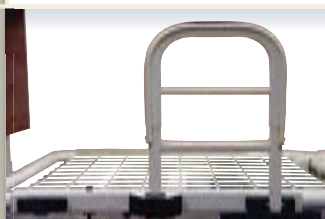

ASSISTS

Assist Device

Features a low profile design, avoiding feeling of restriction or restraint for the resident. Mounted at the perfect ergonomic height to assist residents in and out of bed. Soft-touch handle provides a sturdy handhold for improved resident grip.

Assist Handle

Ergonomically designed to assist residents in and out of bed. Rotates and locks in two positions. Or remove handle completely when not in use. Transferable to the head or foot end to provide residents more assistance where needed.

Joerns PrevaMatt Foam Mattress

Our Deluxe and Elite mattresses with or without TEMPUR® material feature special mattress construction to keep residents in place when articulating the UltraCare XT bed.

Joerns Air System

Our complete line of therapeutic air systems include advanced functionality of CairRails and unique design to enhance your wound management program.

BED SYSTEM OPTIONS
