

Lateral Track

A cost-effective introduction to mobile storage

Lateral Track

Buy complete or integrate with your existing filing equipment. Our Lateral Track system creates two or three sliding rows of storage. Mounted independently to the floor in front of new or existing equipment, a Lateral Track system provides fast access to multiple layers of storage. Since no aisles are required, maximum floor space is utilized.

Expandable. Exceptionally flexible, this modular system can be expanded at any time to accommodate up to three rows in depth and six units in length. Each lateral track row is an independent layer.

Safe and secure. Lateral Track's unique "C" channel design provides a bottom mounted anti-tip mechanism to ensure that shelving units are secure.

Applications

"What an ingeniously simple concept! The Lateral Track system greatly increased our file storage space without the need for a larger storage area."

Facilities Manager

"When our existing shelving became full, our Account Rep. suggested adding a Lateral Track system. It has proven to be a perfect choice for our office. A simple addition that substantially boosts our storage capacity."

Office Manager

Performance

Conserve floor space and filing time

Lateral Track offers up to five times the storage of conventional four-drawer filing cabinets. Plus, with no drawers to open and close, Lateral Track systems free up to 50% of normal filing time.

MORE INFO.

For more detailed performance comparisons, see page 68 or call your Account Representative.

Design Features

Installing your Lateral Track system

1. Set rear units in place, if not already existing.

2. Assemble track pieces to system length.

3. Lay down rear track. Check level and shim if necessary.

4. Use carriage to set front track. Level, if necessary. Fasten tracks to floor. Attach rear anti-tip brackets to carriages.

5. Set shelving on carriage(s).

6. Attach shelving to carriage with screws provided.

Complete Lateral Track Bi-file Systems

Includes stationary shelving, track, end stops, lateral carriages, and mobile shelving

Specifications:

- all stock carriages are Black; specify Sand or Light Gray shelves
- all systems below come with L&T Shelving 76" high with 8 shelves, 7 openings see page 18 for Shelving specifications
- for tri-file systems – select one system unit from chart below and one from chart on page 57 with the same size and quantity of mobile units
- overall system height is 80 1/4"
