

## Misc- 92 – Wall Mounted Diagnostic Set

### Heine Wall-Mounted Diagnostic Set

Includes specula dispenser and wall board, as well as the following:

#### **BETA 200 Ophthalmoscope**

- Features a dust-proof instrument head, precision aluminum chassis, Glare Managing Optical Systems for a bright image of the fundus, and Heine's XHL Xenon Bulb Technology for a bright white light.

#### **K 180 Fiber Optic Otoscope**

- Fiber optic illumination provides homogenous light with a reflex-free view of the tympanum and ear canal.
- Scratch-resistant optical glass viewing window provides 30% greater magnification than a traditional otoscope.

#### **GAMMA XXL Latex-Free Wall Sphyg**

- Features polycarbonate construction with a pressure-proof manometer, precision air release valve for steady air release adjustment, and oversized scale that can be viewed from any direction.
