

**Project Engineer: Eric Voorhees, P.E.**

**Engineer's Daily Summary: Friday, October 5, 2012**

**Project No: 68828/HPRM-0003(135) & 67789**

**Project Name: Wrangell Road and Utility Improvements**

**Weather:  $\approx 46^\circ$ , Foggy, Calm**

- Late yesterday evening and early this morning SEC worker Brandt pressure washed specific areas of glass seeded concrete to provide more uniform glass exposure.
- SEEM 3-person survey party was on-site setting property corners throughout the day. They made good progress and will finish setting property corners tomorrow morning.
- I worked on various paperwork, project close-out and de-mobing tasks throughout the day, including:
  - Finalized and sent project Material Certification binder to Trinie Kelly.
  - Packing up project office supplies
- SEC worker removed plywood forming beneath the cantilevered sidewalk at the SNO Building.
- Late in the evening I reviewed, stamped and signed project pay files as finalized for the end of the project. Only a few files remain to be signed.

I am scheduled to leave Wrangell permanently tomorrow morning and return to Anchorage. I will continue to work from DOWL HKM's Anchorage office on project close-out tasks. This will be my final Engineer Daily Summary for the project.
