Compost!

The community garden collects and uses compost as follows:

- Please follow directions on the bins.
- Add only fruits, veggies, coffee grounds, shredded newspaper, egg shells, etc.
- No meat or meat products (bones, etc.), breads or potatoes.
- No weeds, grass or glossy paper.

Community Projects!

If you have a community clean-up project, you may contact Wrangell Public Works to see if your project qualifies for free plastic bags. These are specifically NOT for regular household waste, rather community-oriented projects.

Zaks Restaurant has some containers available for reuse, such as egg cartons, plastic jugs, etc. Selection varies week to week. Help yourself!

City Dump (Material Transfer Facility)

Hours:

Tues-Fri 8:30-11:00am, 12:00-2:30pm

COMMUNITY COMPOST

Step 1. Collect fruits, veggies, coffee grounds, shredded newspaper, eggs, ect. (no meat/meat product, breads or potatoes) in a reusable container.

Step 2. Add food scraps/paper to the compost bin labeled “Add”.

Step 3. Cover food scraps with three of your container’s worth of browns

Step 4. Secure Lid!

During the Fall of 2019, Wrangell Cooperative Association IGAP staff completed a waste characterization study. Approximately 1,700 lbs of trash was surveyed and 40% of the trash could be composted (food scraps and paper products).

For 2018, Wrangell paid \$219,852.44 (more than any year since 2013) to ship 1,581.75 TONS of trash down to a WA landfill. "By weight, the largest contributing waste category that is transhipped is food waste at 33% of the overall poundage for the week," (Wrangell Integrated Solid Waste Mgmt Plan, 2020).

Wrangell is full of very resourceful, skilled and motivated community members; we can work together to shrink the amount of waste that we pay to have shipped down to Washington.
